As part of the transaction, cynosure interface solutions (Cynosure India) did not 13 million rupees. NEW DELHI: Zensar said today that it will get Cynosure for about USD 33 million, a move that will help the Indian IT company strengthen its game of insurance verticals. Cynosure focuses on providing guidewire platform implementation services for real estate and accident (P&T; C) insurers and generated revenues of approximately USD 20 million in 2017. The addition of Cynosure helps strengthen the insurance vertical vertical that accounts for about 15 percent of the business... the total deal size is approximately USD 33 million combined with a performance-affiliated earnout, Zensar CEO and MD Sandeep Kishore told PTI. The acquisition is financed by a mixture of internal accruals and external debts. As part of the transaction, the total share capital of Cynosure Interface Solutions (Cynosure India) will be collected for an amount not exceeding R13 million. Zensar Technologies Inc -- a fully owned subsidiary of Zensar -- will procure the total equity of Cynosure Inc for about USD 31 million and deferred payments, provided it meets its performance targets 24 months after closing. Zensar said in a regulatory filing. Cynosure is an offshore development center in Bengaluru, India. Cynosure is a Guidewire partner and is well kept in the market, so experts in this field. They bring successful implementations, ensuring the modernisation of the basic system with rich customer relationships, which are a significant added value in our range, kishore said. Post the acquisition, Cynosure continues to manage the founders, led by CEO and co-founder Sid Wadhwa. Cynosure's management and team in the U.S. and Bengaluru, India, have more than 150 people, becoming an insurance vertical part of Zensar.
